

Sintex

SAAF. SAFE. SAHI.

**Next-Gen
Water
Management
Solutions**

THANK YOU

- Leading Water Tank Brand of India since 50 years.
- 200 liters to 16 Lakh liters of tank capacity for Retail & Commercial usage.
- Category creators & leaders with top class Quality & Innovation.
- Sintex is now a part of Welspun World, a \$5 billion Indian conglomerate.

Water Tanks (4P & Popular Range) | Community Panel Tanks |
Underground Tanks | Septic Tanks | Sewage Treatment Plants

4P PRODUCT RANGE

With unique health advantages.

PROBLEM

The water stored in ordinary tank does not always remain safe for various household usage because it further develops fungus, algae, bacteria and virus.

SOLUTION

Sintex Water tanks come with unique **Active Silver technology** that provides **4P Advantage** - **Protection against Virus, Bacteria, Fungus & Algae**

Sintex Water Storage tanks come with “**Active Silver Technology**” that provides a unique Anti-microbial layer that protects the growth of pathogens under stored water conditions.

- Post site inspection, get a detailed storage tank recommendation customised for your premises.
- Final payment & tank installation

MYTH

Competitors' tanks are heavier, so that means they are sturdier too.

FACT

Local brands add calcium carbonate and fillers to their tanks, making the water hazardous. In contrast, Sintex tanks are designed to be lighter, stronger, and safer.

MYTH

The harder the tank, the more durable it is.

FACT

Overhead tanks must expand and contract with water levels and temperature changes. Rigid tanks can crack easily, but Sintex uses LLDPE, making them more flexible and durable.

MYTH

Only virgin (non-recycled) plastic is used in making all water tanks.

FACT

Competitors' tanks often use recycled plastic, which may contain harmful chemicals like lead and phthalates. Sintex tanks are made from 100% virgin plastic, ensuring total safety.

WATER TANKS MYTHS & FACTS

MYTH

All non-black tanks of the competitors are UV stabilized like Sintex tanks.

FACT

Most competitor non-black tanks lack complete UV protection, leading to algae growth and unhealthy water. In contrast, all Sintex tanks, whether black or non-black, are UV protected.

MYTH

The lid of a tank does not need UV protection.

FACT

As the topmost part of a tank, the lid requires UV protection more than any other surface. Competitors' non-black tanks lack UV protection on their lids, while Sintex is the trusted brand in the country to offer complete UV protection for non-black tank lids.

MYTH

Our competitors sell tanks that have 4, 5, 6 or even 7 layers.

This means they are much stronger.

FACT

More layers in a tank don't equate to increased strength. Additional layers provide no real benefits and can make the tank unnecessarily rigid and heavy.

MYTH

Local tanks offer exact water storage capacity as promised

FACT

Local competitors' tanks provide 10% to 15% less water storage than what they claim. Whereas, Sintex tanks offer exact water storage capacity as promised.

MYTH

Our competitors make tanks using only food grade plastic.

FACT

Many competitors use recycled plastic, which may contain fillers, toxins, and carcinogens like phthalates. Sintex tanks, made from food-grade plastic, ensure safe and hygienic water storage.

WATER TANKS MYTHS & FACTS

MYTH

Detergent is good enough to clean the water tank.

FACT

Using detergents for cleaning water tanks can be hazardous due to the chemical residues they leave behind. Switching to Sintex KleanKit can help ensure your water storage tanks are clean and safe for use.

MYTH

Every black tank is a Sintex tank.

FACT

Remember the saying, "All that glitters is not gold"? This applies to Sintex as well. Customers may go to buy a Sintex tank but end up with a competitor's product. All Sintex tanks feature our logo, so customers should ensure they look for it.
